

BLIZZARD NAVY (08072)

Improved architecture
for direct harvest

NAVY BEAN

Improved architecture for direct harvest

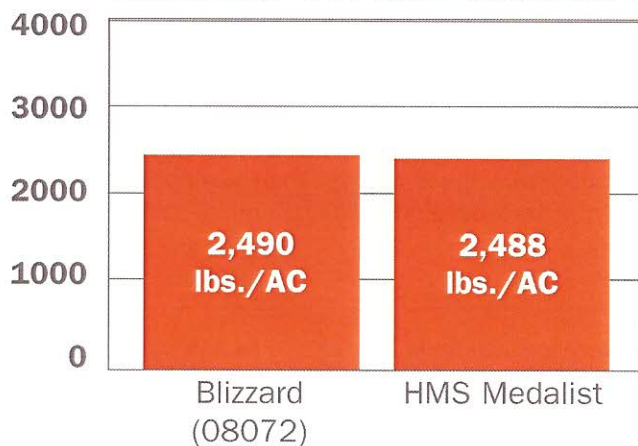

Profile:

Navy Blizzard (08072) is a broadly adapted navy bean variety ideally suited to North Dakota, Minnesota, Michigan, and Ontario production regions. A consistent performer throughout the trialing process and in commercial production, its upright architecture, high pod set, and excellent yield potential make it an excellent choice for direct harvesting and conventional growers.

While maintaining a comparable yield to HMS Medalist, Blizzard (08072) matures out 2 day's earlier than HMS Medalist providing further flexibility in planting and harvest dates. Blizzard (08072) has shown improved higher pod height than HMS Medalist.

BLIZZARD VS. HMS MEDALIST

Yield data based on 36 yr./locations of data.
Data from 2010 - 2016 trials in Bay, Huron, Sanilac, Tuscola, Pigeon, Ruth and more.

TRIAL DATA

Blizzard (08072)

| | |
|---------------------------|--|
| Approx. Maturity | 97-101 days or 2 days earlier than HMS Medalist |
| Plant Type | Upright architecture |
| Approx. Seed Count | 2,272 seeds/lb. |
| Disease Resistance | "I" gene for bean common mosaic virus; is resistant to Anthracnose (race 7) and has shown similar resistance to rust as HMS Medalist in the CSU rust trials. |

Maturity data is based on 21 yr./locations of data.
Seed count based on 14 yr./locations of data.

For customers around the world, ADM draws on its resources—its people, products, and market perspective—to help them meet today's consumer demands and envision tomorrow's needs.
